

Welcome

Our students achieve

Loganlea High School has long been recognised for excellence and innovation in education at the local, State and Federal level. It has earned this reputation through sustained and deliberate focus on providing student-centred curriculum that optimises success for all students, whether their future goals include further study or direct entry into the world of work.

We are proud of our students and what they achieve! The front foyer of the school is adorned with Awards, Certificates and an ever-changing photographic testimony of student excellence. Whether it be the outstanding achievements of our award winning Cattle Show Team at the Royal show; the extraordinary talents of the Dance team; the courage and dedication of the School Band on their outback concert tour or our students innovative academic responses of the 2008 Opti-Minds challenge, we celebrate their achievements every day.

Our curriculum is diverse and challenging, providing learning opportunities to prepare students for access to an enormous range of professions, vocations and fields of study. The curriculum is supported by a dedicated Corporate and Industry network, strategic partnerships with Universities and TAFE and an extensive in-house Student Services network, all working together with our families to ensure that each student achieves the best possible outcome for their education.

We offer flexibility, responsiveness to need and dedication to the pursuit of excellence for all our students. We recognise the complexity of the world into which our students are moving and work diligently to organise the school and curriculum to ensure that each one is well prepared to face the challenges and trials of the 21st Century World beyond school. We are proud of our school. We are proud of our teachers and we are particularly proud of our students!
