Year 10 - A Year of Transition

Year 10 is a transition year which provides a foundation for senior studies. All students study a core of English, Mathematics, Science (one semester) and History (one semester). In addition, students select 6 semesters of elective studies. Some subjects are offered as a single semester of study others for two semesters. Certificate subjects can be continued into Years 11 and 12 as required. Read through the subject descriptions in this guide to ensure you select subjects that suit your needs and interests.

In making your selection of Year 10 subjects, ask yourself the following questions:

- What subjects do I like?
- In which subjects am I most successful?
- Am I more suited to the practical subjects than the academic subjects?
- What subjects am I likely to be studying in Year 11?
- Have I made a balanced selection of subjects?

ASSESSMENT AND REPORTING

In Year 10, curriculum performance in ACARA curriculum is measured against a standard and graded on a five-point scale. Study in nationally accredited vocational studies begins for all students in Year 10. Vocational education subjects are competency based and recorded based on progress towards certificate completion. Assessment programs are referred to briefly in the subject descriptions in this guide.

Students receive a report at the end of each semester, similar to the reports received during Year 8 and 9. In addition, all students receive an interim report to indicate progress over the first 10 weeks of the semester. Successful completion of vocational certificates also contributes to Senior Exit results through the Queensland Certificate of Education QCE.

A synopsis of the QCE follows, however more information regarding this is available on the QCAA website.
www.qcaa.qld.edu.au

How does the QCE work?

To receive a QCE, you must achieve 20 credits of learning, at the set standard, in a set pattern, while meeting literacy and numeracy requirements.

Typically, students will study six subjects/courses across Years 11 and 12. Many students choose to include vocational education and training (VET) courses in their QCE pathway and some may also wish to extend their learning through university courses or other recognised study. In some cases, students may start VET or other courses in Year 10.

Set amount

- 20 credits from contributing courses of study, including:
- QCAA-developed subjects or courses
 - vocational education and training qualifications
 - non-Queensland studies
 - recognised studies.

Set pattern

- 12 credits from completed Core courses of study and 8 credits from any combination of:
- Core
 - Preparatory (maximum 4)
 - Complementary (maximum 8).

Set standard

Satisfactory completion, grade of C or better, competency or qualification completion, pass or equivalent.

Literacy & numeracy

Students must meet literacy and numeracy requirements through one of the available learning options.

School Based Apprenticeships and Traineeships (SATs)

Loganlea State High School offers a program which incorporates a School Based Apprenticeship or Traineeship in the Senior Phase of learning (Years 10, 11 and 12).

Benefits of Completing a School Based Apprenticeship or Traineeship

- Students will be eligible upon completion of the Apprenticeship/Traineeship (SAT) to receive a nationally recognised vocational education and training qualification
- Contributes points towards their QCE (Queensland Certificate of Education)
- Training with a Registered Training Organisation
- An easier transition from school to work
- Payment for the time spent in the workplace
- VET qualification can lead to an entry into tertiary education
- Learning and Earning
- Real job skills in real work situations.

Structure

There are several options for students who become a School Based Apprentice or Trainee. Each case will be determined individually to accommodate both the employer and the student needs.

Students will attend school 4 days per week to complete school subjects. On the fifth day, students will be employed in the workforce where they will be engaged in paid, productive work. They may also be involved in off-the-job training with a Registered Training Organisation. School-based Traineeships may be completed during the Senior Phase of Learning. Students completing a School-based Apprenticeship will continue either full time or part time after Year 12.

Cost For Students/Parents

- If students are required to travel these costs must be met by the student/parents
- The off-the-job training with a Registered Training Organisation will be funded by the DETE (Department of Education Training and Employment) while students are school based.

School Based Apprenticeships and Traineeships (SATs) Cont'd

Possible Traineeships/Apprenticeships

NB: Employers have the right to choose the most appropriate applicant so the school can make no guarantees of placement. Examples:

Business Administration	Hospitality	Furnishing	Public Services
Refrigeration/Air-conditioning	Horticulture	Hairdressing	Printing
Multi-media/Information Technology	Retail	Child Care	Tourism
Building and Construction	Education	Automotive	Medical and Dental
Sport and Recreation	Manufacturing	Warehousing	Bakery/Pastry
Aged Care/Residential	Mechanics	Engineering	Plumbing

The school will accept applications for any other Apprenticeship or Traineeship that is currently available and will endeavour to find work place and training opportunities. If students have a particular area other than the above this would certainly be considered.

It is important that students are very sure about their goals and career plans before signing up. They must be committed to completing their senior schooling, as well as completing all training and workplace requirements. For further information for parents and students, application forms and brochures, contact the VET Co-ordinator in the Connections Office.

Career Advice

As you move into Year 10, it is important that you begin to explore the range of career opportunities in the light of your abilities, interests and achievements. If you can identify some career goals, it will put additional purpose into your schooling and give you something to strive for.

Students and parents are also invited to discuss, with the Guidance Officer or Teachers, any concerns, they may have about student progress at school or any difficulties that students may be experiencing. Students always have direct access to the Guidance Officer and can make appointments at times suitable to the student, the classroom teacher and the Guidance Officer.

During Year 10, you will be assisted in developing a "Senior Education and Training" plan (SETp or SET plan). This plan maps out how you will work towards a Senior Certificate, Certificate II vocational qualification and/or a viable work option.

The SET plan is designed to:

- work as a 'road map' to help you achieve your learning goals during the Senior Phase of Learning, · include flexible and coordinated pathway options,
- assist you to examine further options across education, training and employment sections, and help you to communicate with your parents/carers or personnel from your school/learning provider.

In your personal plan, you will be able to list a variety of different learning pathways, some of which you may access outside the current formal structure of your school. This will allow you to create more options and flexibility in your learning. The plan can be altered if you decide to change direction and explore different learning pathways.

Occupations Related to Subjects in Year 10

Have you thought about the type of work you would like to do when you finish school? It is wise to begin investigating possibilities early because the better informed you are, the better decisions you will make in the future.

You can use the table on pages 6 and 7 to investigate careers by relating your interest in school subjects to possible occupations.

You may wish to use the following steps:

- identify the subjects you enjoy and do best in
- use this table to identify the types of occupations that may be related to these subjects
- gather information about these occupations by reading the 'Job Guide', accessing information from the 'myfuture' website (<http://www.myfuture.edu.au>), going on work experience, and talking to people in the workforce
- talk to your Guidance Officer or Career Counsellor.

As you learn more about yourself and about jobs, you may change your ideas about the type of jobs you are interested in. This is part of the process most people go through before deciding on a post-school occupation or before changing from one occupation to another during their career.

Although subjects can be related to a number of jobs, very few of the subjects are pre-requisites for those jobs. A prerequisite subject is one which must be studied in Years 11 and 12 to gain entry to a specific tertiary course. However, a small number of Year 11 and 12 subjects require previous study in Years 9 and 10. Talk to your Guidance Officer or Career Counsellor about these prerequisites.

ENGLISH	LANGUAGES OTHER THAN ENGLISH
English	French, German, Italian, Japanese, Indonesia, Chinese, Korean, Spanish
Actor	Announcer
Archivist	Anthropologist
Author	Archaeologist
Book editor	Book editor
Broadcaster	Customs officer

Speech pathologist		Sound technician	Make-up artist
Stage manager		Stage manager	Multimedia developer
Teacher - dance		Teacher -early childhood	Photographer
Teacher – speech & drama		Teacher -music	Screen printer
Tour guide		Teacher - primary	Set designer
Writer		Teacher - secondary	Sign writer

English - 2 Semesters (Compulsory)

Why study English?

To become a fully rounded person and an effective member of the workforce and society, it is important to be able to communicate in both the spoken and written forms. The study of English enables us to articulate our thoughts as well as critically analyse information presented to us by the media, politicians and others attempting to influence our thinking.

The study of English can also fulfil a personal, aesthetic role in providing students with opportunities to read and view a range of interesting texts from different genres and time periods.

This is a core subject which aims to develop students' skills and abilities in using English as active and informed citizens. The course enhances language growth through reading, writing, listening, speaking and viewing. Students will compose and comprehend English for a wide range of personal and social purposes. They will experience and explore a variety of communication forms in various relevant social settings.

Course Outline:

Two Points to a Tale	An exploration of literary texts (poetry lyrics and short stories) Extended Spoken Response (Closing Argument)
Satire	A study of language devices and text structures in Satire (Multimodal).
Fantasy Fiction	Escapism in popular culture (Feature Article)
Death to Shakespeare	A study of Shakespeare in a contemporary context (Argument, Review or Performance).

Assessment:

Students will complete a number of assessment tasks, both spoken and written. Genres include persuasive, narrative, analytical and multimodal.

Future Pathways:

Senior General English fulfils the QCE literacy requirement and is required for ATAR eligibility. Students planning to pursue university study should aim to achieve a B or higher in Year 10 English to meet the General English pre-requisites. Essential English fulfils the QCE literacy requirement and students should aim to achieve a C or higher in year 10 to support senior schooling success.

Mathematics - 2 Semesters (Compulsory)

If you are planning to study Mathematical Methods in years 11 and 12, please advise Head of Department as this will impact your class placement.

Why study Mathematics?

Mathematics has the power to shape the future of society. It is the basis of many activities related to everyday living — from shopping to advances in space travel. Mathematics assists us to develop strategies for managing time and money, interpreting data, estimating and taking measurements, giving and following directions, making calculations and determining the probabilities of events.

The aims for students at Loganlea State High School are:

- to become resilient, confident, creative users and communicators of mathematics, able to investigate, represent interpret situations in their personal and work lives and as active citizens
- to develop an increasingly sophisticated understanding of mathematical concepts, fluency with processes, ability to reason, pose and solve problems in number, algebra, measurement, geometry, statistics and probability
- to recognise connections between the areas of mathematics and other disciplines and appreciate mathematics as an accessible and enjoyable discipline to study.

Course Outline:

In Mathematics, the key ideas are the proficiency strands of understanding, fluency, problem-solving and reasoning. The proficiency strands describe the actions in which students can engage when learning and using the content. While not all proficiency strands apply to every content description, they indicate the breadth of mathematical actions that teachers can emphasise.

The content strands are **number and algebra**, **measurement and geometry** and **statistics and probability**. They describe what will be taught and learnt.

Assessment:

Students will be assessed each semester using a Problem Solving and Modelling Task (PSMT) and an Exam.

Calculator:

A **scientific calculator** is an essential tool for every maths student – a two-line display calculator is preferred (recommended CASIO FX82AU PLUS II Scientific Calculator).

Future Pathways:

Success in the **Signature Mathematics** class is a pre-requisite for Mathematical Methods and Specialist Mathematics in Year 11 and 12. Enrolment in this subject is by invitation. If you wish to do Mathematical Methods and Specialist Mathematics, speak to the Head of Department regarding enrolment into Signature Mathematics in Year 10.

Careers such as engineering, the physical sciences, some agriculture degrees, accounting, food technology, economics and management, psychology to name a few, require Mathematical Methods. Mathematical Methods is often recommended for access to engineering, electrical and other apprenticeships. Even if students choose to study General Mathematics in Year 11, they will have an advantage in the breadth and depth of mathematics studied if they pursue this course.

Students planning to pursue university study should aim to achieve a B or higher in Year 10 mathematics to meet the Mathematical Methods and General Mathematics pre-requisites. Students should aim for a C or higher to support senior school success in Essential Mathematics.

Science - 1 Semester (Compulsory)

Why study Science?

Humans are innately curious about their world. Science is a dynamic, collaborative and creative human endeavour arising from our desire to make sense of our world through exploring the unknown, investigating universal mysteries and solving problems. The knowledge it produces has proved to be a reliable basis for action in our personal, social and economic lives. Science aims to understand a large number of observations in terms of a much smaller number of broad principles.

The study of science supports students to develop the scientific knowledge, understandings and skills to make informed decisions about local, national and global issues. Science promotes the use of critical and creative thinking, problem solving and decision making. It encourages students to reflect on and monitor their thinking as they make decisions and take action. As students think and work scientifically, they construct understanding of scientific concepts.

Course Outline:

Science has three interrelated strands:

- Science Understanding**
 Science understanding is evident when a person selects and integrates appropriate science knowledge to explain and predict phenomena, and applies that knowledge to new situations. The Science Understanding strand comprises four sub-strands: Biological Sciences, Chemical Sciences, Earth and Space Sciences, and Physical Sciences.
- Science as a Human Endeavour**
 Through science, humans seek to improve their understanding and explanations of the natural world. This strand highlights the development of science as a unique way of knowing and doing, and the role of science in contemporary decision making and problem solving. It acknowledges that in making decisions about science practices and applications, ethical and social implications must be taken into account.
- Science Inquiry Skills**
 Science inquiry involves identifying and posing questions; planning, conducting and reflecting on investigations; processing, analysing and interpreting evidence; and communicating findings. This strand is concerned with evaluating claims, investigating ideas, solving problems, drawing valid conclusions and developing evidence based arguments.

In year 10 students can choose to study Introduction to Senior Science in Semester 2, in addition to Science the choice they make should complement the learning pathways they will be undertaking in years 11 and 12.

History - 1 Semester (Compulsory)

Why study History?

History aims to profile the rich tapestry of human endeavour, achievement and disaster from pre-history to modern day. Students will be required to develop higher order thinking skills by using the process of inquiry, providing excellent preparation for tertiary study. The course places a great deal of importance on literacy skills with a strong emphasis on research skills and the use of specific genres.

Course Outline:

Students will study 5 sub strands:

- World War II
- Building Modern Australia - Rights and Freedoms

Assessment:

Assessment focusses on the development of research and inquiry skills. Students will complete a written investigation (Historical Essay) and a Source Analysis portfolio.

Future Pathways:

This subject gives the student skills that transcend subject disciplines; skills of critical inquiry, decision-making, hypothesis testing and synthesis, which are valuable in almost every tertiary degree or career. Students with a background in history are sought-after in a multitude of careers extending from finance, health sciences and the public service to education.

Active Volunteering - 2 Semesters (Elective)

Certificate I in Active Volunteering CHC14015

This subject is available to students by invitation only in Year 10.

Why study Active Volunteering in Year 10?

The Certificate I in Active Volunteering provides opportunities for students to explore the varied dimensions of volunteering, communication and organisational skills to effectively equip themselves for moving into the workforce. Further studies at a Certificate II level are optional.

Course Outline:

The Certificate I in Active Volunteering may be started at the beginning of Year 10, 11 or 12 and will take 12 months to complete. This course will be studied through the following units of competency. To achieve this qualification, the candidate must have completed **at least 20 hours** of volunteer work as detailed in the Assessment Requirements of units of competency. Participation in volunteer work placements/activities within the school and the wider community is mandatory. (A Volunteering Blue card is required for placement where you will be working with minors.)

Competencies	
Core units: CHCDIV001 – Work with diverse people CHCVOL001 – Be an effective volunteer HLTWHS001 – Participate in workplace health and safety.	Listed elective: HLTFSE001 – Follow basic food safety practices CHCCOM005 – Communicate and work in health or community services.

Assessment:

This qualification is competency based assessment and students will be provided multiple opportunities to demonstrate competency through a range of practical and theoretical tasks:

- Assessment tasks require student to demonstrate both their knowledge and skills – in the workplace or in other relevant contexts.
- Students will collate a portfolio of evidence through a combination of assessment methods including:
- **Written assessment:** Written responses to questions or scenarios – which may include short answer, paragraph responses or multiple choice.
- **Case studies:** Allows opportunity for students to display process and problem-solving skills in a set of integrated tasks.
- **Practical activity:** Tasks which require demonstration of skills. This may occur in the workplace or classroom, either real-life or simulated scenarios.

Observation: Involves witnessing the demonstration of a student's performance.

Future Pathways:

Through participation in this course of study, students will develop industry standard knowledge and skills to:

- Undertake administrative tasks
- Communicate effectively within the workplace environment
- Apply problem-solving skills in familiar contexts
- Engage in safe work practices and apply basic operational knowledge
- Contribute to the community and connect with others
- Understand the important role a volunteer plays within the community
- Develop workplace networks.

Agriculture - 2 Semesters (Elective)

Certificate II in Agriculture AHC20122

Why study Agriculture in Year 10?

Studying agriculture enables students to participate in a vocational course with an Animal Production focus. In this activity-based subject students learn by doing, develop a commitment to the environment, good work ethic (both independently and in a team) and prepare for the workplace. There is a focus on planning and carrying out routine tasks with some assistance. This course is essentially a practical course, involving hands-on situations both on and off campus.

Course Outline:

It consists of compulsory core and elective units of competency. The Certificate II in Agriculture will take up to 24 months to complete. This course will be studied through the following units of competency.

Competencies	Core (4) Elective (12)
Core units: AHCWHS202 - Participate in work health and safety processes AHCWRK212 - Work effectively in the industry AHCWRK211 - Participate in environmentally sustainable work practices AHCWRK213 - Participate in workplace communications Elective Group A: AHCCHM201 - Apply chemicals under supervision AHCINF205 - Carry out basic electric fencing operations AHCINF206 - Install, maintain and repair farm fencing AHCINF207 - Maintain properties and structures AHCLSK223 - Carry out regular livestock observation	Elective Group A cont: AHCLSK224 - Handle livestock using basic techniques AHCLSK225 - Identify and mark livestock AHCLSK227 - Monitor water supplies AHCLSK228 - Muster and move livestock AHCLSK229 - Provide feed for livestock AHCWRK210 - Observe and report on weather AHCWRK215 - Collect and record production data

Assessment:

Students must be prepared to "get their hands dirty". The assessment criteria and assessment methods are stated in each unit of competency. Competence will be achieved when the learner can successfully complete the learning outcomes. Part-completion of the course will result in the student being issued with a Statement listing industry competency standards in which the student has demonstrated competence. The course allows for the recognition of a student's prior learning (referred to as "RPL") should the student proceed into a TAFE program incorporating units of competency already determined as competent while at secondary school.

The RTO guarantees that the student will be provided with every opportunity to complete the certificate as per the rights and obligations outlined in the enrolment process and VET information provided on the student drive. Students successfully achieving all qualification requirements will be provided with a qualification and record of results. Students who achieve at least one unit (but not the full qualification) will receive a Statement of Attainment.

Future Pathways:

The school currently offers two Certificate II programs in Years 11 and 12. These programs extend what is learnt in Year 10 in a very practical, skills-based way. The skills and knowledge gained in this course are an advantage to students wishing to enter the rural trades as well as any of the higher education courses in agricultural colleges. The skills learned are also extremely useful in "real life" after school.

Applied Digital Technology - 2 Semesters

(Elective)

Certificate II in Applied Digital Technology ICT20120

Why study Applied Digital Technology?

This entry level qualification provides the foundation skills and knowledge to use information and communications technology (ICT) in any industry. This course encourages the ability to communicate effectively and to use technology-specific language appropriately, accurately and confidently while developing the personal attributes of self-reliance, responsibility, self-management and the ability to work in a team.

Course Outline:

This course may be started at the beginning of year 10, 11 or 12 and will take 12 months to complete. By the conclusion of the course of study, students should have developed industry standard knowledge and skills to use social media tools for collaboration and engagement, install software applications and integrate commercial computing packages.

Competencies:

Competencies	
Core units: BSBWHS211 - Contribute to health and safety of self and others BSBSUS211 - Participate in environmentally sustainable work practices ICTICT213 - Use computer operating systems and hardware BSBTEC202 - Use digital technologies to communicate in a work environment ICTICT214- Operate application software packages ICTICT215 - Operate a digital media technology package	Elective Group A: ICTICT216 - Design and basic organisational documents BSBTEC203 - Research using the internet ICTICT223 - Install software applications BSBTEC303 – Create electronic presentations Elective Group B: BSBTWK201 - Work effectively with others Other: SIRXCEG006 - Provide online customer service

Assessment:

This course is competency based. Where a student can demonstrate prior learning in a particular learning outcome or an individual performance criterion within a learning outcome, the student is eligible for recognition of prior learning. The assessment tools include quizzes, case studies, practical activities, observation and projects.

Future Pathways:

This qualification provides foundation digital literacy skills to support a wide range of varying industry occupations. Pathways include Certificate III in Information Technology, or a range of other Certificate III qualifications.

Art (Visual Art) - 2 Semesters (Elective)

Why study Visual Art?

The arts are a powerful vehicle for communication, a way to express visions that are beyond the capacity of words and a medium for cultural enlightenment. Learning in Visual Arts involves students making and responding to artworks, drawing on the world as a source of ideas.

Students engage with the knowledge of visual arts, develop skills, techniques and processes, and use materials as they explore a range of forms, styles and contexts. Through Visual Arts, students learn to reflect critically on their own experiences and responses to the work of artists, craftspeople and designers and to develop their own arts knowledge and preferences. They learn with growing sophistication to express and communicate experiences through and about visual arts. Studying the Arts helps students build valuable employability and 21st-century skills that can be applied across a wide range of careers, both within the creative industries and beyond.

Students who select this subject may have the opportunity to extend their learning in a **Visual Preparation** class, where they will study alongside **Year 11 and 12 General Visual Art students** and engage with more advanced artistic concepts and practices.

Course Outline:

Unit One - Body as Lens

Assessment – Extended response – reverse chronology

Project – experimental folio, wearable art garment and photoshoot

Unit Two - Politics as Code

Assessment – Project – sculpture and extended response

Project – painting and exhibition

Future Pathways:

Artist, Graphic artist, Commercial artist, Arts officer/consultant, Photographer, Web Design, Interior Design, Book Illustrator, Sculptor, Exhibition Curator.

Business - 2 Semesters (Elective)

Certificate III in Business BSB30120

Why study Business?

This qualification reflects the role of individuals in a variety of Business Services job roles. It is likely that these individuals are establishing their own work performance criteria.

Individuals in these roles carry out a range of routine procedural, clerical, administrative or operational tasks that require technology and business skills. They apply a broad range of competencies using some discretion, judgment and relevant theoretical knowledge. They may provide technical advice and support to a team.

This business course will equip you for several different roles in a wide range of workplace environments. You will have the skills to work productively in a team, support and work inclusively with colleagues, communicate with others in the workplace, write documents, create presentations, complete projects, organise schedules, manage resources and customers, and more.

Course Outline

This course may be started at the beginning of year, 10, 11 or 12 and will take 12-24 months to complete. This Certificate III will be studied through the following units of competency.

Competencies:

Competencies	
Core units: BSBCRT311 - Apply critical thinking skills in a team environment BSBPEF201 - Support personal wellbeing in the workplace BSBSUS211 - Participate in sustainable work practices BSBTWK301 - Use inclusive work practices BSBWHS311 - Assist with maintaining workplace safety BSBXCM301 - Engage in workplace communication	Elective Group A: BSBTEC201 – Use business software applications BSBTEC302 - Design and produce spreadsheets BSBTEC301 - Design and produce business documents BSBTEC303 - Create electronic presentations BSBWRT311 - Write simple documents Elective Group B: BSBPEF301 - Organise personal work priorities Elective Group C: BSBXTW301 - Work in a team

Assessment:

This course is competency based. Where a student can demonstrate prior learning in a particular learning outcome, the student is eligible for recognition of prior learning. The assessment tools include student workbooks, observations and practical activities within a simulated work environment where students will gain experience in the Business field.

Future Pathways:

A certificate course of study in Business can lead to traineeship and employment opportunities in a wide range of areas.

Administration assistant
Clerical worker

Data entry operator
Information desk clerk

Personal assistant
Office junior

Receptionist
Office managers
Secretaries

Chinese - 1 Semester (Elective)

Why study Chinese?

Australia's links with China are growing now and will continue to grow in the future. Therefore, being able to speak Chinese and having inter-cultural language skills are significant assets that students can offer their employers in the future. Studying a language exposes students to a different culture, fostering tolerance, empathy and understanding.

Course Outline:

The primary focus of this course is to use Chinese language to initiate and sustain interactions while sharing others' experiences of the world.

Students will listen, speak, read, view and write to communicate with speakers of Chinese in local and global settings.

Assessment:

Assessment will examine the evolution of Chinese herbology and other forms of traditional medicine by:

- Creating a bilingual social media campaign
- Transcribing texts from Chinese to English and English to Chinese
- A comprehension examination.

Future Pathways:

A second language is an asset in many career paths: from hospitality and tourism, to commerce, construction, trade, banking, retail, agriculture and the public service. Students intending to study General Chinese as part of their ATAR pathway must study Year 10 Chinese.

Cookery - 2 Semesters (Elective)

Certificate II in Cookery SIT20421

Why study Certificate II in Kitchen Operations?

The hospitality industry has become increasingly important in Australian society as a source of expanding employment opportunities. This certificate course provides students with a wide range of interpersonal skills with a general application in personal and working life and specific knowledge and skills related to the food preparation industry.

This subject is a highly practical course which provides students the opportunity to complete a Certificate II in Cookery. This is a nationally recognised qualification which may lead to further employment and training in many areas of the Hospitality industry. Loganlea SHS has a Trade Training Centre (TTC) which provides a commercial kitchen and attached restaurant setting for this training to occur. Students must be committed to participation in both theory and practical elements of the course, excursions, structured work placement in a commercial setting and completion and submission of all assessment. As part of this course students will need to attend out of school hours functions as required in order to demonstrate the appropriate competencies to complete the qualifications. Students will always have advanced notice of their required attendance.

Course Outline:

This course may be started at the beginning of year 10, 11 or 12 and will take 24 months to complete. Students will complete a program of study which includes 7 core units and 5 elective units. The Certificate II in Kitchen Operations structure is based on the packaging rules described in the Tourism, Hospitality and Events training package (SIT 12).

Competencies

Core topics	Elective topics
SITXWHS005 Participate in safe work practices SITXFSA005 Use hygienic practices for food safety SITHCCC027 Prepare dishes using basic methods of cookery SITHCCC034 Work effectively in a commercial kitchen SITHKOP009 Clean kitchen premises and equipment SITHCCC023 Use food preparation equipment SITXINV006 Receive, store and maintain stock	Elective Group A: SITXFSA006 Participate in safe food handling procedures SITHCCC024 Prepare and present simple dishes SITHCCC028 Prepare appetisers and salads SITHCCC025 Prepare and present sandwiches Elective Group D: SITXCOM007 Show social and cultural sensitivity SITXCCS011 Interact with customers

Assessment:

Cookery uses competency-based assessment. Students will have many opportunities to demonstrate competence through a range of practical and theoretical tasks.

These may include: written tests, observations with checklists, portfolios, teacher questioning, practical functions/restaurants, practical exams and structured work placement.

Future Pathways:

Pathways from the qualification – After achieving SIT20421 Certificate II in Cookery, individuals could progress to a wide range of other qualifications in the hospitality and broader service industries in the Tourism, Hospitality and Events Training Package (SIT 12) This qualification may provide a pathway to work in various hospitality settings, such as restaurants, hotels, motels, catering operations, clubs, pubs, cafes and coffee shops.

Dance Preparation - 2 Semesters (Elective)

Why study Dance?

Dance Preparation offers students who are interested in undertaking an ATAR pathway the chance to develop a movement vocabulary with which to explore and refine imaginative ways of moving individually and collaboratively. Students choreograph, rehearse, perform and respond as they engage with dance practice and practitioners in their own and others' cultures and communities. Active participation as dancers, choreographers and audiences promotes students' wellbeing and social inclusion. Dance has the capacity to engage, inspire and enrich all students, exciting the imagination and encouraging students to reach their creative and expressive potential. Studying the Arts helps students build valuable employability and 21st-century skills that can be applied across a wide range of careers, both within the creative industries and beyond.

Course Outline & Assessment:

Students will have the opportunity to study a range of different dance texts, genres/styles and develop:

- Technical and expressive skills for performance
- Choreographic techniques
- Analytical and evaluative processes
- Collaborative and interpersonal skills
- Digital literacy

Assessment:

Students will complete a range of different assessment tasks, both practical and theory based, where they will be required to **analyse**, **choreograph** and **perform** a range of different dance works.

Future Pathways:

Dance Preparation is an excellent introduction for students wishing to continue in this subject area in Year 11 and 12. The academic rigour and skills developed across the program prepare students for study in Year 11 and 12 **General Dance (ATAR)**.

Drama in Practice - 2 Semesters (Elective)

Why study Drama in Practice?

Drama in Practice gives students opportunities to plan, create, adapt, produce, perform, appreciate and evaluate a range of dramatic works or events in a variety of settings. Students participate in learning activities that apply knowledge and develop creative and technical skills in communicating meaning to an audience. Students learn essential workplace health and safety procedures relevant to the drama and theatre industry, as well as effective work practices and industry skills needed by a drama practitioner.

This subject, if chosen again and completed in Year 11, could contribute up to 4 QCE points.

Pathways:

A course of study in Drama in Practice can establish a basis for further education and employment in the drama and theatre industry in areas such as performance, theatre management and promotions.

Structure

Drama in Practice is a four-unit course of study. This syllabus contains four QCAA-developed units, Collaboration, Community, Contemporary and Commentary, as options for schools to combine in any order to develop their course of study.

Assessment:

Students complete two assessment tasks for each unit. The assessment techniques used in Drama in Practice are:

Technique	Description	Response requirements
Devising project	Students plan, devise and evaluate a scene for a focus of the unit.	Devised scene Planning and evaluation of devised scene
Directorial project	Students plan, make and evaluate a director's brief for an excerpt of a published script for the focus of the unit.	Director's brief Planning and evaluation of the director's brief
Performance	Students perform the excerpt of the published script, a devised scene, or collage drama for the focus of the unit.	Performance Performance (live or recorded): up to 4 minutes

Drama Preparation – 2 Semesters (Elective)

Why study Drama Preparation?

Drama Preparation offers students who are interested in undertaking an **ATAR pathway**. Through practical and creative exploration, students learn how to devise, perform and analyse drama while experimenting with a range of dramatic forms, styles and conventions.

Students develop confidence in performance, collaboration and creative problem-solving as they work both independently and in ensembles. They also build skills in interpreting scripts, developing characters, staging performances and reflecting on the impact of drama for different audiences and purposes. Studying the Arts helps students build valuable employability and 21st-century skills that can be applied across a wide range of careers, both within the creative industries and beyond.

Course Outline & Assessment:

Students will have the opportunity to study a range of different drama texts, forms/styles and develop:

- Elements and conventions of drama
- Performance techniques
- Analytical and evaluative processes
- Collaborative and interpersonal skills
- Stagecraft, lighting and sound

Assessment:

Students will complete a range of different assessment tasks, both practical and theory based, where they will be required to **analyse**, **devise** and **perform** a range of different drama works.

Future Pathways:

Drama Preparation is an excellent introduction for students wishing to continue in this subject area in Year 11 and 12. The academic rigour and skills developed across the program prepare students for study in Year 11 and 12 **General Drama (ATAR)**.

Early Childhood Studies - 2 Semesters (Elective)

Why study Early Childhood Studies?

Early Childhood Studies focuses on students learning about children aged from birth to five years through early childhood education and care. While early childhood learning can involve many different approaches, this subject focuses on the significance of play to a child's development. Play-based learning involves opportunities in which children explore, imagine, investigate and engage in purposeful and meaningful experiences to make sense of their world.

Students have opportunities to learn about the childcare industry, such as the roles and responsibilities of workers in early childhood education and care services.

Units of Study:

Early Childhood Studies focusses on the assessable elements of Knowledge and Understanding and Skills. Through the formulation of inquiry projects students will develop and refine their skills in these areas across a semester of study of the following units.

Year A:

- Play and Creativity
- Children's Development

Year B:

- The Early Childhood education and care sectors
- Indoor and Outdoor learning environments

Assessment:

Assessment includes:

- Investigation and multimodal presentation
- Project

Future Pathways:

A course of study in Early Childhood Studies can establish a basis for further education and employment in health, community services and education. Work opportunities exist as early childhood educators, teacher's aides or assistants in a range of early childhood contexts.

Economics and Business - Semester 2

(Elective)

Why study Economics and Business?

Economics and Business provides students with an opportunity to learn about the global economy they live in. The study of Economics and Business can provide valuable knowledge for making decisions in everyday life. They will develop a deeper understanding and knowledge of resources, businesses and the way they respond to opportunities. Students investigate 21st century problems, propose solutions and develop inquiries about the standards of living for Australians now and into the future.

Units of Study:

Economics and Business focusses on the assessable elements of Knowledge and Understanding and Skills. Through the formulation of inquiry projects students will develop and refine their skills in these areas across a semester of study of the following unit:

- Productivity, Growth and Living Standards

Assessment:

Assessment includes a range of written tasks, oral tasks, stimulus response examinations and ongoing moderated individual and group activities.

Future Pathways:

Budding entrepreneurs and business owners will be exposed to the use of data and information including how it is used to make informed financial decisions. This course will teach students the fundamental principles relating to Economic theories from the perspective of not only business owners, but also individuals.

Fashion - 2 Semesters (Elective)

Why study Fashion?

Technology has transformed fashion into a fast-paced global industry. Advanced machinery makes fabric production highly efficient. Digital media opens up exciting career paths. These include fashion design, manufacturing, merchandising, and sales.

Every day, you choose what to wear. Your outfits show your unique personal identity. Some clothing choices are purely practical. Others express your creative, artistic style. In a fashion class, you discover your own style. You learn to spot popular trends. You use your imagination to design real garments. You also learn how the business works. Hands-on projects teach you safe production skills. You practice managing budgets and meeting client needs.

These design tasks build important 21st-century skills. You learn to solve problems. You learn to collaborate with classmates. This practical experience prepares you for future employment.

Units of Study:

Fashion is a four-unit course of study. Units are:

- Fashion Designers
- Slow Fashion
- Collections
- Adornment

Assessment:

Students complete two assessment tasks for each unit. The assessment techniques in Fashion are:

Technique	Description	Response requirements
Project	Students design and produce fashion garment/s, drawings, collections or items.	Fashion product Product: fashion garment/s Planning and evaluation Multimodal (at least two modes delivered at the same time): up to 5 minutes, 8 A4 pages, or equivalent digital media
Practical demonstration	Students create/design and/or produce an outfit, garments, campaigns or extension lines.	Unit-specific product Product: inspiration/presentation board, awareness campaign that uses technology or marketing campaign Planning and evaluation Multimodal (at least two modes delivered at the same time): up to 5 minutes, 8 A4 pages, or equivalent digital media

Future Pathways:

A course of study in Fashion can establish a basis for further education and employment in the fields of design, personal styling, costume design, production manufacture, merchandising, and retail.

Film Preparation - 2 Semesters (Elective)

Why study Film Preparation?

Film Preparation offers students who are interested in undertaking an ATAR pathway the opportunity to develop knowledge and skills in creative thinking, communication, collaboration, planning, critical analysis and digital and ethical citizenship. They will develop the necessary critical and creative skills to reflect on and appreciate Australian and global cultures and make sense of what they see and experience. Studying the Arts helps students build valuable employability and 21st-century skills that can be applied across a wide range of careers, both within the creative industries and beyond.

Course Outline:

Students will have the opportunity to study a range of different media texts and genres and develop skills in:

- Film, television and new media design, production and editing
- The language of film, television and new media
- Analytical and evaluative skills
- Collaborative and interpersonal skills
- Digital literacy

Assessment:

Students will complete a range of different assessment tasks, both practical and theory based, where they will be required to **analyse**, **design** and **produce** a range of different media artworks.

Future Pathways:

Film Preparation is an excellent introduction for students wishing to continue in this subject area in Year 11 and 12. The academic rigour and skills developed across the program prepare students for study in Year 11 and 12 **General Film, Television and New Media (ATAR)**.

Film Preparation may lead to the following career pathways:

Advertising, Arts Administration and Management, Communication, Design, Education, Film and Television, Journalism, Public Relations.

Financial Services - 2 Semesters (Elective)

Certificate II in Financial Services FNS20120

Why study Financial Services?

The financial services industry plays an important role in everyday life and the Australian economy. Understanding how money works, including budgeting, taxation, credit and superannuation, is an essential life skill.

This certificate course provides students with the knowledge and practical skills needed to understand financial systems and make informed financial decisions. Students will learn how financial services operate and develop skills that can be applied in both personal and workplace situations.

This subject is a practical course where students develop financial literacy and workplace skills using industry-relevant technology and software. Students will complete a variety of projects and activities that build their understanding of personal finance and the financial services industry.

Course Outline:

This course may be started at the beginning of Year 10, 11 or 12 and will take two semesters to complete.

Students will complete a program of study that includes 4 Core Units and 4 Elective Units. These units develop knowledge of financial services, budgeting, taxation, credit, superannuation and workplace skills used in the finance industry.

Students will participate in practical learning activities such as developing personal budgets, exploring consumer credit and debt, learning about taxation and superannuation, using business software and spreadsheets, and communicating financial information.

Core Competencies	Elective Competencies
BSBCMM211 Apply communication skills	FNSFLT211 Develop and use a personal budget
BSBTEC201 Use business software applications	FNSFLT213 Develop knowledge of debt and consumer credit
BSBWS211 Contribute to health and safety of self and others	FNSFLT214 Develop knowledge of superannuation
FNSINC311 Work together in the financial services industry	FNSFLT216 Develop knowledge of taxation

Assessment:

Assessment in this course is competency-based. Students will demonstrate their skills and knowledge through practical projects, research tasks, financial planning activities and workplace-style assignments.

Assessment tasks may include budgeting projects, research into taxation and superannuation, activities exploring consumer credit, use of spreadsheets and financial software, and written responses demonstrating financial knowledge.

Future Pathways:

After achieving this Certificate II in Financial Services, individuals may progress to further study such as Certificate III or IV in Financial Services, Business or Accounting qualifications.

This qualification provides foundational knowledge for careers in banking, insurance, business administration, finance support roles and other areas within the financial services industry. It also equips students with important life skills such as managing money, understanding tax and making informed financial decisions.

Geography - Semester 1 (Elective)

Why study Geography?

Geography is an area of study that is concerned with the relationship between society and the environment. It is a discipline that combines both the physical and social sciences and by doing so, provides students with the skills and conceptual frameworks needed to understand the complex processes that shape the world around them. It covers a range of approaches to society and the environment, including natural systems, political economy and cultural politics. Students will learn something about every region of the world in Geography. They will learn how to not only manipulate data, but to be able to make logical decisions.

Units of Study:

Environmental Change and Management - Geographies of Human Wellbeing

Assessment:

Assessment is based on a number of tasks aiming to develop geographical inquiry skills. Genres include geography reports, data response tests and stimulus response tasks.

Future Pathways:

In an increasingly complex world, the ability to make informed, critical judgements on issue-based problems is a highly desirable and a life-long skill to have. Students considering studying General Geography as part of their ATAR pathway are encouraged to study Year 10 Geography.

Health - 2 Semesters (Elective)

Why study Health and Physical Education?

Students Studying Health will highlight the value and dynamic nature of the discipline, alongside the purposeful processes and empathetic approach needed to enact change. The investigative skills required to understand complex issues and problems, will enable interdisciplinary learning and prepare students for further study and a diverse range of career pathways. The development of problem-solving and decision-making skills will serve to enable learning now and in the future.

Course Outline:

Students define and understand broad health topics, which they reframe into specific contextualised health issues for further investigation. Students plan, implement, evaluate and reflect on action strategies that mediate, enable and advocate change through health promotion:

Semester 1

- Resilience
- Body Image

Semester 2

- Anxiety
- Transport Safety

Assessment:

Students will be required to complete a number of assessment tasks, including:

- Written exams
- Written homework research tasks
- Written research assignment
- Action Research Projects

Future Pathways:

Health is an elective subject in Year 10. It is strongly recommended to study this subject in preparation for Senior Health as it covers basic foundational skills that will be needed.

Sport and Recreation Foundations -

2 Semesters (Elective)

Why study Health, Sport and Recreation?

Participation in sport and recreation can make positive contributions to a person's wellbeing. Sport and recreation activities also represent growth industries in Australia, providing many employment opportunities, many of which will be directly or indirectly associated with hosting Commonwealth, Olympic and Paralympic Games. The skills developed in Sport & Recreation may be oriented toward work, personal fitness or general health and wellbeing. Students will be involved in learning experiences that allow them to develop their interpersonal abilities and encourage them to appreciate and value active involvement in sport and recreational activities, contributing to ongoing personal and community development throughout their lives. Active participation in sport and recreation activities is central to the learning in Sport & Recreation. Sport & Recreation enables students to engage in sport and recreation activities to experience and learn about the role of sport and recreation in their lives, the lives of others and the community.

Engagement in these activities provides a unique and powerful opportunity for students to experience the challenge and fun of physical activity while developing vocational, life and physical skills.

Course Outline:

Semester 1

- Participation in Sport and Recreation
- Coaching

Semester 2

- Officiating
- Event Management

Assessment:

Each unit requires that students engage in sport and/or recreation activities. They investigate, plan, perform and evaluate procedures and strategies and communicate appropriately to particular audiences for particular purposes

Future Pathways:

A course of study in Sport & Recreation in year 10 lays the foundations for Sport & Recreation in year 11 & 12.

Physical Education Foundations -

2 Semesters (Elective)

Why study Health & Physical Education?

Students studying Physical Education Foundations are learning skills for life. This subject provides them with the opportunities to learn and to practice these life skills. The course focuses on Personal Development, Personal Health, and Physical Activity.

Course Outline:

Students will learn “in, about and through” Physical Education. The theory component of this subject covers Physical Education (exercise science) and personal fitness. Students will get a solid foundation of Senior Physical Education and its structure as well as its ways of working. Learning about the content is quite literally putting theory into practice on the court or field with the idea of improving performance through physical education principles. Year 10 content will cover the following:

Semester 1

- Functional Anatomy
- Biomechanics
- Tactical Awareness

Semester 2

- Energy Systems
- Sports Psychology

Practical Areas:

Students will participate in a selection of the following:

- Badminton
- Basketball
- Touch
Football/Volleyball/Soccer/Netball

Assessment:

Students will be required to complete a number of assessment tasks, including:

- Written exams
- Project Folios
- Investigation Report
- Workbook
- Video - Practical Performance

Future Pathways:

Physical Education is an elective subject in Year 10. It is strongly recommended to study this subject in preparation for Senior Physical Education and/or Sport and Recreation.

Horticulture - 2 Semesters (Elective)

Certificate II in Horticulture AHC20422

Why study Certificate II in Horticulture?

The course enables students to participate in studies with a horticulture focus and achieve vocational outcomes. It is an activity-based subject where students learn by doing, develop a commitment to sustainability and healthy environmental practices, good work ethic (both independently and in a team) and prepare for the workplace.

Course Outline:

This course involves practical, hands-on, industry relevant experiences both on and off campus. It consists of core (i.e. compulsory) and elective units of competency. There is a focus on planning and carrying out routine tasks with some assistance. As students are involved in practical tasks related to this industry, they need to be prepared to do physically challenging tasks during the course of this subject. Students will learn about plants, different plant types, how to select plants, plant care and safety, plant environments, planting processes and procedures and plant protection.

Competencies:

Competencies	Core (8) Elective (7)
Core Units: AHCMMOM203 – Operate basic machinery and equipment AHCPCOM204 – Recognise plants AHCPCGD207 – Plant trees and shrubs AHCPCMG201 – Treat weeds AHCPCMG202 – Treat plant pests, diseases and disorders AHCPSOL203 – Assist with soil or growing media sampling and testing AHCWHS202 – Participate in workplace health and safety processes AHCWRK211 - Participate in environmentally sustainable work practices	Electives Units: AHCCHM201 - Apply chemicals under supervision AHCPCDG209 - Prune shrubs and small trees AHCPCGD210 – Transplant shrubs and small trees AHCNSY205 – Pot up plants AHCNSY207 – Undertake propagation activities AHCWRK210 - Observe and report on weather AHCCLSC210 – Install tree protection devices

Assessment:

Skill and knowledge assessments are essential step in progressing through your course. You may be assessed in a number of ways while you are studying, including observation, written assessment, questioning, portfolios and work samples.

Future Pathways:

A certificate course of study Horticulture can establish a basis for further education and employment in a range of fields such as: Horticultural assistant, grounds maintenance, landscaping, greenkeeping, horticulture retail, nursery or garden labourer.

Hospitality - 2 Semesters (Elective)

Certificate II in Hospitality SIT20322

Why study Hospitality?

The hospitality industry has become increasingly important in Australian society as a source of expanding employment opportunities. This certificate course provides students with a wide range of interpersonal skills with a general application in personal and working life, as well as specific knowledge and skills related to employment within the hospitality industry.

This subject is a highly practical course which gives students an opportunity to complete Certificate II in Hospitality. Students must be committed to participation in theoretical and practical lessons, excursions, Industry Placement, and the completion/ submission of all assessment. As part of this course students will need to attend out of school hours functions as required in order to demonstrate the appropriate competencies to complete the qualifications. Students will always have advanced notice of their required attendance.

Course Outline:

This course may be started at the beginning of year 10, 11 or 12 and will take at least 12 months to complete. Students will complete a program of study which includes 6 Core Units & 6 Elective Units. The Certificate II in Hospitality structure is based on the packaging rules described in the Tourism, Hospitality and Events training package (SIT13).

In Hospitality, students have the opportunity to develop industry standard knowledge and skills in food and beverage production, handling and function service. Students will work individually and as part of a team.

Competencies

Core topics	Elective topics
SITXWHS005 Participate in safe work practices SITHIND006 Source and use information on the hospitality industry SITHIND007 Use hospitality skills effectively SITXCCS011 Interact with customers SITXCOM007 Show social and cultural sensitivity BSBTWK201 Work effectively with others	Elective Group A: SITXFSA005 Use hygienic practices for food safety Elective Group B: SITHFAB024 Prepare & Serve Non-Alcoholic Beverages SITXFIN007 Process financial transactions BSBCMM211 Apply communication skills BSBTEC201 Use business software application TLIE0009 Carry out basic workplace calculations

Assessment:

Hospitality is competency-based assessment. Students will have many opportunities to demonstrate competence through a range of practical and theoretical tasks.

These may include: folio of work, observations, performance in functions, role play, interviews, diary/ journal, research assignments written tests, oral presentations, structured work placements. This course may be continued the following year or until completion.

Future Pathways:

Pathways from the qualification – After achieving this Certificate II in Hospitality, individuals could progress to a wide range of other qualifications in the hospitality and broader service industries. This qualification may provide a pathway to work in various hospitality settings, such as restaurants, hotels, motels, catering operations, clubs, pubs, cafes and coffee shops. Possible jobs could include bar attendant, bottle shop attendant, café attendant, catering assistant, food and beverage attendant, front office assistant, gaming attendant, porter or room attendant.

Information Technology – 2 Semesters

(Elective)

Certificate III in Information Technology (ICT30120)

Why study Information Technology

This qualification provides the skills and knowledge for an individual to be competent in a wide range of general information and communications technology (ICT) technical functions and to achieve a degree of self-sufficiency as an advanced ICT user. Persons working at this level will support information technology activities in the workplace across a wide range of ICT areas, including technical support, network administration, web technologies, software applications and digital media technologies.

By the conclusion of the course of study, students should have developed industry standard knowledge and skills to run standard diagnostic tests, work and communicate effectively in an IT environment and build simple websites using commercial packages.

Course Outline:

This course has a flexible rolling start. Students may start at the beginning of year 10 or after completion of this Certificate II in Applied Digital Technology. It usually takes 2 years to complete this course. Students enrolling in year 12 will be eligible for credit for the competencies that they complete.

Competencies

Competencies	
Core Units: BSBCRT301 – Develop and extend critical and creative thinking skills BSBXCS303 – Securely manage personally identifiable information and workplace information BSBXTW301 – Work in a team ICTICT313 – Identify IP, ethics and privacy policies in ICT environments ICTPRG302 – Apply introductory programming techniques ICTSAS305 – Provide ICT advice to clients Elective Group J: ICTWEB431 – Create and style simple markup language documents ICTWEB304 – Build simple web pages ICTWEB305 – Produce digital images for the web	Elective Group D: CUADIG301 – Prepare video assets CUADIG303 – Produce and prepare photo images Elective Group H: ICTPRG430 – Apply introductory object-orientated language skills

Assessment:

This course is competency based. Where a student can demonstrate prior learning in a particular learning outcome or an individual performance criterion within a learning outcome, the student is eligible for recognition of prior learning. The assessment tools include quizzes, case studies, practical activities, observation and student selected projects.

Future Pathways:

This qualification provides digital literacy to support a wide range of occupations. Pathways include Certificate IV and Diploma studies in Information Technology. Career paths may include: help desk officer, IT technician, administrative roles, network security, network support officer and website testing.

Introduction to Senior Sciences –

1 Semester (Elective)

In Year 10 students explore systems at different scales and connect microscopic and macroscopic properties to explain phenomena. Students explore the biological, chemical, geological and physical evidence for different theories. Atomic theory is developed to understand relationships within the periodic table. Understanding motion and forces are related by applying physical laws. Relationships between aspects of the living, physical and chemical world are applied to systems on a local global scale and this enables students to predict how changes will affect equilibrium within these systems.

Course Outline:

The units studied in Year 10 Science are:

- Life blue prints
- Life evolves
- Chemistry isn't magic
- Chemical reactions matter
- Moving along
- Energy of motion
- The universe
- Global systems

Assessment:

Students will be required to complete a number of assessment tasks including

- Experimental investigations (designing and performing laboratory investigations)
- Research assignments
- Oral presentation
- Practical reports
- Written tests
- In-class workbooks

Homework:

A minimum of 2½ hours per week of home study is needed if students hope to gain a Sound Achievement.

Future Pathways:

Introduction to Senior Science is a pre-requisite for Chemistry, Physics, Biological Science or Agricultural Science at a Year 11 and 12 level. A Sound level of achievement in science is a requirement of many TAFE apprenticeship courses.

Mechanics - 2 Semesters (Elective)

Certificate II in Automotive Vocational Preparation

AHC20720

Why study Certificate II in Automotive Vocational Preparation?

The course enables students to participate in a vocational Mechanics course with a vehicle development focus. It is an activity-based subject where students learn by doing, develop a commitment to the mechanical ideologies, good

Competencies:

Competencies

Core units:

AURAEA002 - Follow environmental and sustainability best practice in an automotive workplace
AURAF103 - Communicate effectively in an automotive workplace
AURAF104 - Resolve routine problems in an automotive workplace
AURASA102 - Follow safe working practices in an automotive workplace
AURETR103 - Identify automotive electrical systems and components
AURLTA101 - Identify automotive mechanical systems and components
AURTTK102 - Use and maintain tools and equipment in an automotive workplace

Elective:

AURETR001 – Remove and tag automotive electrical system components
AURTTA001 – Remove and tag steering, suspension and braking system components
AURTTA127 – Carry out basic vehicle servicing operations
AURTTE003 – Remove and tag engine systems components
AURTTQ002 – Remove and refit drivelling components

work ethic (both independently and in a team) and prepare for the workplace. There is a focus on planning and carrying out routine tasks with some assistance. This qualification is an introductory qualification to the automotive service and repair industries and an entry to further training in several sectors. By the conclusion of the course of study, students should have developed industry standard knowledge and skills related to primary and associated industries.

Course Outline:

This is a two-year course. The RTO guarantees that the student will be provided with every opportunity to complete the certificate as per the rights and obligations outlined in the enrolment

process and VET information provided on the student drive. Students successfully achieving all course requirements will be provided with a qualification and record of results. Students who achieve at least one unit will receive a Statement of Attainment.

Assessment:

Assessment techniques include observation of practical performance, teacher questioning and written response. Assessment strategies vary depending on the unit of competency and the setting of the task. Assessment criteria and techniques are stated in each unit of competency.

Future Pathways:

This course of study can form a basis for further education and employment in fields such as, light vehicle mechanic, Agricultural / Heavy vehicle mechanic, mobile plant, auto electrical, heavy commercial vehicle.

Media Arts in Practice - 2 Semesters (Elective)

Why study Media Arts in Practice?

Media arts refers to art-making and artworks composed and transmitted through film, television, radio, print, gaming and web-based media. Students explore the role of the media in reflecting and shaping society's values, attitudes and beliefs. They learn to be ethical and responsible users and creators of digital technologies and to be aware of the social, environmental and legal impacts of their actions and practices. Students develop the necessary knowledge, understanding and skills required for emerging careers in a dynamic and creative field that is constantly adapting to new technologies. Learning is connected to relevant arts industry practice and opportunities, promoting future employment and preparing students as agile, competent, innovative and safe arts workers, who can work collaboratively to solve problems and complete project-based work.

This subject, if chosen again and completed in Year 11, could contribute up to 4 QCE points.

Pathways:

A course of study in Media Arts in Practice can establish a basis for further education and employment in a dynamic, creative and global media industry that is constantly adapting to new technologies, as well as more broadly in fields such as education, marketing, humanities, recreation, health and science.

Structure:

Media Arts in Practice is a four-unit course of study. This syllabus contains four QCAA-developed units, Personal Viewpoints, Representations, Community and Persuasion, as options for schools to combine in any order to develop their course of study.

Assessment:

Technique	Description	Response requirements
Project	Students make and evaluate a design product and plan a media artwork.	Design product Planning and evaluation
Media Artworks	Students make a media artwork to express a personal viewpoint by implementing the design from the Project task.	Media artwork

Music - 2 Semesters (Elective)

Why study Music?

Studying Music provides students with valuable personal and creative skills. Through performance, listening and music-making, students build self-confidence, strengthen interpersonal and communication skills and develop confidence in their creative abilities. They also gain an understanding of how music is created and learn to value live performance as a rich and rewarding artistic experience. Studying the Arts helps students build valuable employability and 21st-century skills that can be applied across a wide range of careers, both within the creative industries and beyond.

Course Outline:

The course focuses on developing students as performers, composers and critical listeners. Students learn to:

Perform music using appropriate vocal or instrumental techniques, both individually and in ensembles.

- Compose and arrange music, manipulating the elements of music (such as rhythm, melody, harmony, texture, dynamics and structure) to communicate ideas and meaning.
- Listen to and analyse music from different cultures, times and styles, evaluating how composers and performers use musical elements to engage audiences.
- Develop aural and notation skills, including recognising musical patterns, chord progressions and stylistic features.
- Explore personal style and creativity, documenting and presenting their compositions and performances for an audience

Future Pathways:

The study of music can lead to continued study in Years 11 and 12 in General Music (ATAR) or Music in Practice (Applied), and to a variety of job opportunities in music performance, sound engineering, business and other jobs in the music industry.

Outdoor Recreation — 2 Semesters (Elective)

Certificate II in Outdoor Recreation SIS20419

Why Study Outdoor Recreation?

This qualification reflects the role of individuals who assist with operational logistics and the delivery of recreational activities. They work under direct supervision and with guidance from those responsible for planning, finalising and delivering activities, including program managers and leaders

Assistants use a range of fundamental activity techniques during activities and can work in indoor and outdoor recreation environments, adventure learning centres or camps.

This subject involves preparing students for employment and participation in the Outdoor Recreation sector by developing core (i.e. compulsory), activity specific and general industry competencies. Students undertake camps, school activities and day trips as a way to develop the required skills and knowledge associated with the activity skills which include canoeing, kayaking, fishing, bushwalking and navigation. Students will also develop the required skills to respond to emergency situations, including aquatic rescues and assist in leading recreation activities.

QCE Points:

Completion of this course may contribute up to 4 points.

Subject Levy:

This subject incurs a Levy of \$300 per year. This covers the cost of camp fees, camp food, day trips and equipment usage across the whole year. Payment plans are available and require a \$50 deposit to be made at time of enrolment.

Course Outline:

This course involves students camping and engaging with activities in the outdoors. It consists of core (i.e. compulsory) and selected units of competency. The elective streams are Fishing, Bushwalking and Canoeing. This course involves students in the outdoors and physical activities. Students need to be prepared to do physically challenging tasks during the course of this subject. Students need to be prepared to engage with the natural environment.

This two-year course requires students to be involved in excursions or camps. Students showing interest in these particular electives will be provided with permission slips, current costs and activity requirements before electives are selected

Competencies

Competencies	
Core Units: HLTWHS001 – Participate in workplace health and safety SISOFLD001 – Assist in conducting recreation sessions SISOFLD002 - Minimise environmental impact SIXXIND002 – Maintain sport, fitness and recreation industry knowledge	Group A: SISCAQU002 – Perform Basic water rescues SISOBWG001 – Bushwalk in tracked environments SISOONE001 – Paddle a craft using fundamental skills SISOFLD006 – Navigate in tracked environments SISOFSH001 – Locate, attract and catch fish Group B: SIXXEMR001 - Respond to emergency situations SIXXFAC001 – Maintain equipment for activities

Assessment:

Students are assessed through a range of different modes in this qualification, below is a list of different assessment tools in use.

- **OBSERVATION** – Demonstration of practical skills.
- **QUESTIONING** – Multiple choice question related to knowledge evidence.
- **RESEARCH FOLIO** – Research reports on fish species and environmental features of activity locations.
- **FOLIO OF EVIDENCE** – Documentation produced alongside practical work undertaken (e.g. Hazard Report)

Extension Project:

An optional Extension Project is available for students who are working ahead in the second half of the course. The project includes five core units from the Certificate III in Outdoor Leadership. Students who complete the project may finish with a Certificate II in Outdoor Recreation and all core units for the Certificate III, leaving only 12 elective units required to achieve the full qualification

Units of Competency

- PUAOPE013 — Operate communications systems and equipment
- SISOPLN001 — Finalise operation of outdoor recreation activities
- SISOPLN004 — Identify hazards, assess and control risks for outdoor recreation activities
- SISOPLN005 — Interpret weather and environmental conditions for outdoor recreation activities
- SISXCCS004 — Provide quality service

MANDATORY REQUIREMENTS:

Camps and Day Trips

This course requires students to be involved in excursions or camps. These activities form part of the student's assessments in the qualification. It is therefore important that students attend the camps in this program, to be deemed competent.

** By invitation only

Camps & Excursions	Standard Program	
	First Year	Second Year
Logan River Canoeing	✓	✓
Cooloolo Pack and Paddle Camp (4 Days)		✓
Rogaine	✓	✓
Emergency Response Overnight Camp		✓
Offsite Bushwalk	✓	✓
Fishing	✓	✓
Maroon Base Camp (4 Days)	✓	**
Pool Visit	✓	**
Beach Day Trip	✓	✓
Industry Engagement Day		✓

High Risk Permission

Students will participate in a range of activities, some of which are deemed to be high risk. Before students are able to participate in high risk activities, parental permission must be received. High risk activities student participate in include:

- Canoeing/Kayaking on Flat Water and Grade 1 Water
- High risk fishing locations and equipment (e.g. fishing from boats, fishing with lures and multiple hooks)
- Cooking on a camp stove.
- Swimming in pools and other bodies of water

There is the expectation that students who participate in this subject are physically capable of participating in activities and able to swim at least 50m with minimal assistance.

Positive Notice Blue Card

As part of the qualification, students enrolled are required to assist in conducting Outdoor Recreation Sessions. Their clients may include peers of the same age, staff and peers who are younger (including year 6 students attending a transition to school day).

Due to the nature of the participants, it is a requirement that students apply for a Blue Card (Working with Children Check). This will be facilitated through the school and enrolled students will receive a volunteer Blue Card.

Future Pathways:

Employment opportunities can be found in the following areas - Outdoor guide * Childcare Programs, * Adventure based Programs

Further study opportunities include - Certificate III in Outdoor Leadership (SIS30619)

Information about further study opportunities can be found at <http://training.gov.au/Training/Details/SIS30413>

Pre-Engineering (Metal) - 1 Semester (Elective)

Why study Pre-Engineering?

Pre-requisites: Nil (it is an advantage to have studied some industrial technology subjects in previous years).

Course Outline:

This subject is an introduction to the trade areas associated with the Engineering industry. Students participate in a variety of activities that include:

- Metal machining (Metal Lathe)
- Basic fitting
- Sheet metal fabrication

This busy 6 month program has students working with a variety of metals to produce a number of artefacts.

Assessment:

The assessment program for this subject consists of practical activities, observations and associated theory tasks.

Future Pathways:

Pre-Engineering is aimed at preparing you for any of the Certificate I or II in Engineering Courses offered by Registered Training Authorities and Traineeships/Apprenticeships in the Engineering area. This course of study can lead directly into the following careers:

- Boiler maker / welder
- Fitter and turner
- Mechanic
- Sheet metal worker
- Metal Machinist

Pre-Furnishing (Timber) - 1 Semester (Elective)

Why study Pre-Furnishing?

Have you ever thought that “I am pretty good with my hands” or “I would like to start directing my future towards a well-paid job in industry” then Pre-Furnishing is for you. The team delivering Pre-Furnishing begins making you work ready, ready for industry and ready to make you real money. You will learn to use workshop machinery to produce fine pieces of furniture, this makes this subject an excellent choice for both males and females.

You can study this subject on its own or complimented with another Industrial Technology subjects (e.g. Pre-Engineering).

Course Outline:

- Students taught to read and understand project plans
- Project demonstrating range of skills
- A study of how various countries from around the world have influenced furniture choice and design.
- (*This is an indication of projects only – they may change without notice)

Assessment:

The main form of assessment will be through the practical work done throughout the semester, with an assessment done at the end of the semester.

Future Pathways:

Pre-Furnishing is aimed at preparing you for Furnishing in Year 11 and 12, this course of study can lead directly into the following careers: Carpenter, Builder, Interior Designer or Decorator, Product Designer, Architect, Fine Furniture construction, Mass produced furniture manufacture, Shop Fitting, Workshop Managers, Set and Stage Designer and Builder, Kitchen Manufacture, Cabinet Maker, Engineer, Home Handyperson/Maintenance, and many more.

Retail Cosmetics – 2 Semesters

(Elective)Certificate II in Retail Cosmetics SHB20121

Why Study Retail Cosmetics?

This qualification reflects the role of retail sales personnel involved in a defined range of tasks to sell and demonstrate beauty or cosmetic products. They follow known routines and procedures, and work under direct supervision. This qualification provides a pathway to work as a retail sales consultant in any business that sells beauty or cosmetic products and services. This can include beauty and hairdressing salons, retail outlets and department stores.

This is a practical based subject which will see students develop their knowledge of the Hair and Beauty industry through engaging with Industry professionals. Students will learn Make up Application, Retail and Sales processes, Tanning and Ear Piercing processes and Product knowledge. There is a focus on individuality and on teamwork as students plan and carry out routine tasks with some assistance. Students will also engage with Social Media platforms to promote their own work.

QCE Points:

Completion of this course may contribute up to 4 points.

Subject Levy:

This course will have a fee of \$ 150.00 attached to cover the costing of a set of Make up brushes and shirt for the program. Please note that this fee and SRS fees will need to be paid for students to participate in the course.

Course Outline and Assessment:

This course may be started at the beginning of year, 10, 11 or 12 and will take 12 months to complete. This course is competency based. Where a student can demonstrate prior learning in a particular learning outcome or an individual performance criterion within a learning outcome, the student is eligible for recognition of prior learning. The assessment tools include theory studies, case studies, practical activities, observation, student selected projects and structured simulated work environments.

Competencies:

Core topics	Elective Topics
SHBBCCS004 Demonstrate retail skin care products SHBBCCS005 Advise on beauty products and services SHBBMUP009 Design and apply make-up SHBXCCS007 Conduct salon financial transactions SHBXIND003 Comply with organisational requirements within a personal services environment SHBXIND005 Communicate as part of a salon team SHBXWHS003 Apply safe hygiene, health and work practices SIRXIND003 Organise personal work requirements SIRXOSM002 Maintain ethical and professional standards when using social media and online platforms	Group A: SHBBINF002 Maintain infection control standards Group B: SHBBRES003 Research and apply beauty industry information SHBBSKS006 Pierce ear lobes SIRRINV001 Receive and handle retail stock Imported Elective: SHBBMUP010 – Design and apply make-up for photography. SHBBBOS007 - Apply cosmetic tanning products

Future Pathways:

Possible job titles relevant to this qualification include: Hair dressing, Beauty Therapist, Make Up Artist, Sales Assistant and Fashion Stylist.

Retail Services - 2 Semesters (Elective)

Certificate II in Retail Services SIR20216

Why study Retail Services:

The certificate II in Retail Services SIR20216 is a qualification that reflects the role of frontline retail team members who use a defined and limited range of operational skills to undertake workplace activities. They are involved in mainly routine and repetitive tasks and work under direct supervision of others. The qualification requires the ability to perform financial calculations, read procedures/instructions and write basic reports.

QCE Points:

Completion of this course contributes 4 QCE points.

Duration:

This course may be started at the beginning of year 10, 11 or 12 and will take 12 months to complete.

Course Outline:

Competencies	
Core units: SIRXCEG001 - Engage the customer SIRXCOM001 - Communicate in the workplace to support team and customer outcomes SIRXIND001 - Work effectively in a service environment SIRXIND003 - Organise personal work requirements SIRXPDK001 - Advise on products and services SIRXRSK001 - Identify and respond to security risks SIRXWHS002 - Contribute to workplace health and safety	Listed Elective: SIRRMER001 - Produce visual merchandise displays SIRXIND002 - Organise & maintain the store environment SIRXIND004 - Plan a career in the retail industry Imported Electives: FSKLRG006 - Participate in work placement SIRXSLS001 - Sell to the retail customer

It is suggested that students purchase a USB flash drive for storage and transferring of files.

Assessment:

This course has been developed to the skills and knowledge required to work within a range of retail settings at school and in the workplace. Students will complete five projects and will be assessed through the following methods:

- Written Assessments
- Short Response & Multiple-Choice Exams
- Practical Observations (at School)
- Role Plays (at School)

Work Experience (3-4days, Outside of School)*

Future Pathways:

By the time you complete the course you will have the skills and knowledge to perform roles such as frontline team member, customer service assistant and point-of-sale operator.

Students who demonstrate capability and independence after completion of this program will be invited to enrol into the SIR30216 - Certificate III in Retail.

This qualification is a pathway to work in a diverse range of retail settings including specialty retailers, supermarkets, department stores and quick service restaurants. *students who currently are employed (for a period of six months) in a retail workplace, will be able to have their current employer sign off a Third Party Report, in lieu of completing a work experience placement.

Skills for Work & Vocational Pathways - 1 Semester (Elective)

Certificate II in Skills for Work & Vocational Pathways FSK20119

Why study Skills for Work and Vocational Pathways?

This qualification is designed to prepare for workforce entry or vocational training pathways.

- A pathway to employment or vocational training
- Reading, writing, numeracy, oral communication and learning skills at Australian Core Skills Framework (ACSF) Level 3
- Entry level digital literacy and employability skills
- A vocational training and employment plan.

QCE Points:

Completion of this course contributes 4 QCE points.

Course Outline:

This course is a work preparation program which will take most students 1 semester to complete (additional time is available on a case-by-case basis to address the needs of students).

Students will study this certificate through the following units:

Competencies	
Core units: FSKLRG011 – Use routine strategies for work related learning	Elective Group B: FSKDIG003 – Use digital technology for non-routine workplace tasks
Elective Group A: FSKNUM014 – Calculate with whole numbers and familiar fractions, decimals and percentages for work	FSKLRG009 – Use strategies to respond to routine workplace problems
FSKNUM015 – Estimate, measure and calculate with routine metric measurements for work	FSKOCM007 – Interact effectively with others at work
Non-listed Elective: BSBCMM211 – Apply communication skills	FSKRDG010 – Read and respond to routine workplace information
BSBTEC201 – Use business software applications	FSKWTG008 – Complete routine workplace formatted texts
AUMFA001 – Apply for jobs and undertake job interviews	FSKWTG009 – Write routine workplace texts
BSBTEC203 – Research using the internet	FSKLRG010 – Use routine strategies for career planning

Assessment:

This course is competency based. Where a student can demonstrate prior learning in a particular learning outcome or an individual performance criterion within a learning outcome, the student is eligible for recognition of prior learning. The assessment may consist of observations, case studies, assignments, team projects, short answer questions, practical activities and portfolio.

Future Pathways:

This provides a foundation for a broad range of entry level positions. Particular areas of employment will have been experienced during this training and could be followed up on successful completion.

Follow link for qualifications pathway information within the Training Package.

Visual Arts - 2 Semesters (Elective)

Certificate III in Visual Arts CUA31125

Why study Certificate III in Visual Art?

The Certificate III in Visual Art offers a great foundation if you're not sure which creative discipline you're interested in - or if you want to get to know about art and the world of visual communications before you go further.

Course Outline:

This course may be started at the beginning of year 10, 11 or 12 and will take 12-24 months to complete. Students will have the opportunity to study and demonstrate a range of skills and use a variety of media.

Core topics and Elective Topics	
BSBWHS211 -Contribute to health and safety of self and others CUAACD311 -Produce drawings to communicate ideas CUAPPR311 -Produce creative work CUARES301 -Apply knowledge of history and theory to own arts practice	Group A: CUADES301 -Explore the use of colour CUADRA311 -Produce drawings CUAPAI311 -Produce paintings CUAPPR312 -Document the creative work progress CUAPPR314 -Participate in collaborative creative projects CUAPRI312 -Produce prints CUASCU311 -Produce sculpture Imported Elective: CUAPPR417 -Select and prepare creative work for exhibition

Assessment:

This course is competency based. Where a student can demonstrate prior learning in a particular learning outcome, the student is eligible for recognition of prior learning. The assessment tools include student workbooks, observations and practical activities within a simulated work environment where students will gain experience in the visual arts field.

Future Pathways:

Artist, Graphic artist, Commercial artist, Arts officer/consultant, Photographer, Web Design, Interior Design, Book Illustrator, Sculptor, Exhibition Curator.r

Vocational Education and Training (VET) Privacy Notice

Under the *Data Provision Requirements 2012*, **Loganlea State High School** is required to collect personal information about you and to disclose that personal information to the National Centre for Vocational Education Research Ltd (NCVER - National Centre for Vocational Education Research) and the Queensland Curriculum and Assessment Authority (QCAA).

Your personal information may be used or disclosed by Loganlea State High School for statistical, administrative, regulatory and research purposes. Loganlea State High School may disclose your personal information for these purposes to:

- Commonwealth and State or Territory government departments and authorised agencies; and
- NCVER

Personal information that has been disclosed to NCVER may be used or disclosed by NCVER for the following purposes:

- populating authenticated VET (Vocational Education and Training) transcripts;
- facilitating statistics and research relating to education, including
- surveys and data linkage;
- pre-populating RTO student enrolment forms;
- understanding how the VET market operates, for policy, workforce planning and consumer
- information; and
- administering VET, including program administration, regulation, monitoring and evaluation.

You may receive a student survey which may be administered by a government department or NCVER employee, agent or third party contractor or other authorised agencies. Please note you may opt out of the survey at the time of being contacted.

NCVER will collect, hold, use and disclose your personal information in accordance with the *Privacy Act 1988* (Cth), the National VET Data Policy and all NCVER policies and protocols (including those published on NCVER's website at www.ncver.edu.au (<http://www.ncver.edu.au/>)).

Loganlea SHS is grateful to the generosity of Stacey Williams, the artist responsible for the artwork on the cover of each Selection Guide.

The information contained in this booklet complies with information held by the school at time of printing.

On receipt of updated information from Authority bodies, the school reserves the right to alter courses to comply with changed requirements.

Subjects that deliver vocational education competencies comply with QCAA guidelines.

Subjects offered will only be timetabled if there are sufficient student numbers for the class to go ahead.
